

ATISHAY JAIN

Full-Stack & Mobile Engineer | React Native · React.js · Node.js · FastAPI

Jaipur, Rajasthan, India | +91-7425085220 | atishay027@gmail.com | linkedin.com/in/atishayjain027 | github.com/Atishay027

PROFESSIONAL SUMMARY

Full-Stack & Mobile Engineer with 3.8+ years building end-to-end products: cross-platform React Native apps (iOS/Android) and React.js/Next.js web dashboards, backed by FastAPI/Node.js services and PostgreSQL/MySQL. Experienced across the full native stack (Xcode/CocoaPods, Android Studio/Gradle, custom Swift/Kotlin native modules) as well as REST/GraphQL API design (documented with Swagger/OpenAPI), authentication and role-based access control, and real-time features (Socket.IO). Shipped 9 production apps with companion web panels to the App Store and Play Store across health, safety, education, golf-tech, and marketplace domains, with a track record of improving test coverage, app stability, and onboarding through CI/CD-driven Agile delivery and AI-assisted tooling (Claude Code, Cursor).

KEY ACHIEVEMENTS

- **Test coverage:** raised from 60% → 90% via Jest unit/integration suites, improving app stability by ~20%
- **Onboarding:** ~30% improvement in completion rate on a production mobile app launch
- **Platform delivery:** 10+ features shipped on a multi-module platform spanning a React Native app plus React admin/vendor/super-admin web dashboards
- **Production footprint:** 9 production apps published to the App Store & Play Store with FastAPI/Node.js backends, REST/GraphQL APIs, and 20+ critical bugs resolved (~15% robustness gain)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, Java, Kotlin, Swift, C++

Mobile: React Native, React Navigation, Redux, Zustand, NativeWind, MMKV, Native Modules (Swift/Kotlin bridging), Hermes, Fabric, TurboModules (New Architecture), Offline Caching, Push Notifications, Deep Linking

Web/Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Web UI

Backend: FastAPI, Node.js, Express.js, REST APIs, GraphQL, Swagger/OpenAPI, Socket.IO/WebSockets, JWT/OAuth, Role-Based Access Control

Databases: PostgreSQL, MySQL, Firebase, Supabase

Native Tooling: Xcode, CocoaPods, Android Studio, Gradle

Testing, CI/CD & Monitoring: Jest, RN Testing Library, GitHub Actions, Docker, App Store Connect, Play Console, Firebase Crashlytics, Sentry

Methodologies & AI Tools: Agile/Scrum, Sprint Planning, Code Reviews, DSA, OOP, Claude Code, Cursor, Prompt Engineering

Tools: Git, GitHub, GitLab, Jira, Figma, Postman

PROFESSIONAL EXPERIENCE

Associate Programmer — Dotsquares Technologies

Sep 2025 – Present

- **Mobile:** Contributed to 10+ core features on a Golf Enterprise Community App, a multi-module React Native golf booking and social-commerce platform — course/event booking, live scorecards, in-app chat, social feeds, food ordering, e-commerce, and subscriptions.
- **Mobile:** Engineered and bridged 3-5 custom native modules (Swift on iOS, Kotlin on Android) to integrate vendor SDKs beyond standard RN libraries, and implemented offline caching for core flows; enabled Hermes and explored Fabric/TurboModules (New Architecture).
- **Backend/Web:** Architected backend services with FastAPI and PostgreSQL (authentication, role-based access control, REST APIs) and developed React admin/vendor/super-admin dashboards for catalog, order, booking, content, and user management, with real-time features via Socket.IO shared across web and mobile.
- **Full-stack delivery:** Delivered UMNO end-to-end — consumer app, web application, and admin panel — for an Australian food-saving marketplace connecting restaurants with surplus meals to nearby diners, including vendor management and CO2/waste reporting.
- **Release ownership:** Authored Jest test suites and configured CI/CD pipelines; owned end-to-end release cycles (build signing, provisioning) across Agile sprints, shipping 9 production apps and their web panels with Crashlytics/Sentry monitoring.

Software Developer — DataPecan

Apr 2024 – Aug 2025

- **Mobile/Web:** Led end-to-end development of a Music Learning Academy platform — a React Native app with 15+ interactive lessons and teacher-guided workflows, plus a web management side for lessons, users, and content — reaching production with a ~30% improvement in onboarding completion.
- **Backend:** Built 12 REST API endpoints and integrated the frontend with a Firebase backend.
- **Quality:** Engineered a comprehensive Jest unit/integration test suite, raising code coverage from 60% to 90% and cutting crash-related instability by ~20%, resolving key crash causes in two-week Agile sprints with product and design.

Junior Software Developer — Hidden Talent

Jan 2023 – Mar 2024

- **Full-stack:** Delivered the GreenValley School platform (React Native mobile app + web) supporting academic and communication workflows for students, staff, and administrators, integrating REST APIs alongside senior developers.
- **Quality:** Resolved 20+ critical bugs, improving platform robustness by ~15% through consistent Agile sprint delivery.

EDUCATION

B.Tech, Information Technology — Swami Keshvanand Institute of Technology (SKIT), Jaipur | Aug 2019 – Jun 2023 | CGPA: 8.2 / 10

CERTIFICATIONS

Claude Code in Action — Anthropic | AI Fluency: Framework & Foundations — Anthropic
